Shopify-grade UI · Built for Indian exporters

Three problems happening in your business right now.

ORDER INTAKE

Pain #1

A buyer sends a photo at 6pm. Someone re-types it at 9am.

Every order — handwritten note, forwarded WA message, or blurry Excel screenshot — gets manually re-entered by your team. Then re-entered again for the quote. Then again for the invoice.

~45-90 min per order in re-entry alone

DEADLINES & TASKS

Pain #2

Container is booked for the 20th. Nobody got reminded until the 18th.

Once a container is planned, the countdown begins — sourcing, packing, labelling, documentation. Without automated checkpoints, the owner ends up doing daily WhatsApp follow-ups with every team member to know where things stand.

Your time spent chasing status, not running the business

PACKAGING & OPS

Pain #3

The packaging team heard it through 3 WhatsApp forwards. The carton size was wrong.

Kosher order spec, label requirements, jar vs packet — this information lives in a chat thread. By the time it reaches the floor, something's wrong. Re-packing a shipped batch costs more than the margin you made.

Rework, delays, and buyer complaints

Before TradeWind vs. after — in your team's actual hours.

MANUAL RE-ENTRY PER ORDER

45–90 min

WhatsApp → Excel → Quote → Invoice. Each step is a copy job.

DAILY FOLLOW-UPS AFTER CONTAINER BOOKING

Manual

Sourcing, packing, labelling, docs — each step needs a nudge. No system tracks it automatically.

BACKTRACKING PRICES TO BUILD A PO

Hours

Cross-referencing old Excel sheets, vendor calls, and quote history just to raise a purchase order.

WHAT CHANGES WITH TRADEWIND

Order intake → structured in <2 min

WA photo, PDF, or message — AI reads it, extracts every field, flags what's unclear. Your team reviews, not re-types.

AI-generated task timeline after container booking

TradeWind breaks down what needs to happen, by when, and for whom — and sends reminders automatically. No more daily status chases.

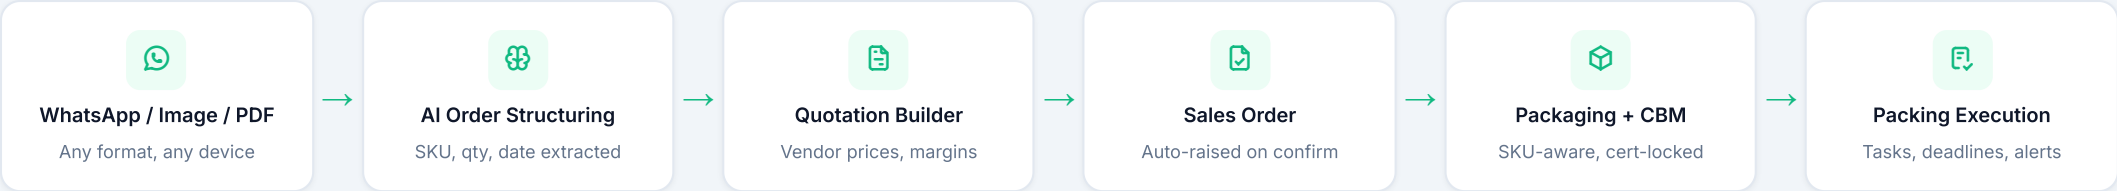

Quote accepted → Sales Order raised automatically

No manual handoff. The moment a quote is confirmed, a Sales Order is created with all order details locked in — ready to trigger packaging and procurement.

PO and Purchase List auto-built from the confirmed order

No Excel backtracking. Prices, quantities, vendor details — all pulled from order history and current rates. Ready in seconds.

One platform. Entire export workflow.

Each step feeds the next. No re-entry. No lost context.

Any format. Any device. Structured in seconds.

TYPE	SENDER	STATUS
IMG	Al Barakah Trading SKU: Cinnamon · 500kg · 14 Jan · Kosher	94% conf.
MSG	Euro Spices GmbH SKU: Cardamom Bold · 200kg · 20 Jan	87% conf.
PDF	Saffron House UK ⚠ 2 fields flagged for review	Review

- **Any intake format**
WhatsApp images, voice notes, PDFs, forwarded messages — all accepted.
- **AI field extraction**
SKUs, quantities, delivery dates, special requirements extracted automatically.
- **Confidence scoring**
Low-confidence fields are flagged for review — never silently wrong.
- **Buyer memory**
Remembers prior orders, usual terms, and pricing tiers per buyer.
- **Works on mobile too**
The full platform is accessible from your phone — review, approve, or flag orders from anywhere, not just the office.

Your vendor prices, packaging costs, FX, and margin — one screen, one send.

SKU	QTY	VENDOR PRICE	PACK COST	MARGIN	TOTAL
CINN-STICKS-001	500 kg	₹280/kg	₹18/kg	11.2%	₹1,49,000
BLK-PEPPER-002	200 kg	₹540/kg	₹22/kg	13.8%	₹1,12,400
TURMERIC-PWD-003	100 kg	₹145/kg	₹12/kg	14.1%	₹15,700

■ Orange = manually overridden · Prices entered by your team from vendor quotes — actual rates vary by vendor and quantity.

Every cost, every surcharge, every rate — named before you send.

PRICE BREAKDOWN — CINN-STICKS-001 · PER KG		
Base commodity price	₹ 280.00	Ramesh Agro, vendor call
+ Kosher cert surcharge	₹ 6.40	Rules engine · auto-applied
+ Packaging (100g kraft)	₹ 18.00	500 bags × ₹9 · from config
+ Inland freight to port	₹ 8.50	Fixed, Mundra port
= EXW Cost	₹ 312.90	
+ FOB freight & insurance	₹ 18.20	Estimated, FOB Mundra
= Total cost (INR)	₹ 331.10	
× FX rate (RBI FBIL)	× 0.01201	Locked · 23 May · 11:30 IST
× Margin	× 1.160	16.0% · set by Rahul
= Quoted price / kg	\$ 4.61	× 500 kg = \$2,305
🔮 AI: This margin (16%) is 2.3% below your Japan average (18.4%). Suggested price: \$4.72.		

Named steps, not a black box

Certification surcharge, packaging cost, freight, FX buffer — every component labelled and visible before you hit send.

FX rate locked at quote save

Rate source, timestamp, and value captured the moment you save. Historical quotes never recalculate with new rates — your original margin is preserved.

Quote versions with diff

Buyer asks for a revision? v1 and v2 sit side by side — every changed input highlighted so there's no confusion about what moved.

AI margin coaching

If a quote deviates from your historical norm for that product and buyer, the system flags it before you send — not after the deal is closed.

Cinnamon sticks aren't cardamom powder. The system knows.

Packaging Config — SO-089

Product

PROCESSING CONSTRAINTS — KOSHER ACTIVE

✓ Allowed methods — set by certification rules

⛔ Blocked methods — auto-restricted by cert

⚠ Required steps — flagged for compliance

Any default can be manually overridden per order if needed.

Carton

24 pkt/ctn · 42×28×28cm · 2.4kg

CBM Usage

18.4 / 33.2 CBM (55%)

- SKU-aware rules**
Powder, sticks, grains, and liquids each follow different packaging logic automatically.
- Three-level rule hierarchy**
Rules set at certification level, country level, or client level — each overrides the one above. Fully configurable for your business.
- Container dashboard**
Live CBM vs booked container — flag wasted space before booking.
- Manual override always available**
Any default — packaging format, processing step, carton config — can be overridden per order when the situation calls for it.

Exactly how many cartons. Which container. Flagged before you book.

CONTAINER PLAN — SO-089 · 20FT FCL

Units per carton	24 packets
Cartons per pallet	48 · (4 layers × 12)
Pallets in container	10
Total cartons	480
Total weight	1,152 kg of 22,000 max
CBM Utilisation	18.4 / 25.0 m³ — 73.6%
⚠ Below 85% — 58 more cartons fit. Consolidate or switch to smaller container.	

CONSTRAINT CHECKS

- ✓ Stack height: 4 layers — within kraft limit (5)
- ✓ Weight per layer: 28.8 kg — within 40 kg limit
- ✓ Kosher: no co-loading with non-certified products
- ⚠ EU destination: ISPM 15 pallet treatment required

AI CONFIG SUGGESTION

Based on similar Kosher spice orders to UAE, exporters use: **30 units per inner box · 8 inner boxes per master carton · EUR pallets · 4-layer stack.**

- Use this config
- Keep current

Photo → dimensions

Photograph your product next to a coin. AI estimates L×W×H and pre-fills the configurator. No spec sheet needed.

Orientation rules

"This side up", liquids, and fragile items are blocked from rotation. The algorithm respects this — no wrong-side-up cartons reaching the floor.

20ft vs 40ft guidance

When utilisation drops below your threshold, the system calculates whether adding volume or switching container size saves money — before you commit the booking.

Rules configured once at every level. Always overridable when your order needs it.

RULE HIERARCHY — APPLIED IN ORDER

-  **Certification level** (e.g. Kosher, Halal, Organic)
-  **Country level** (e.g. EU labelling, US FDA, GCC)
-  **Client level** (buyer-specific preferences and requirements)
-  Any rule can be manually overridden per order — full flexibility when you need it.

CERTIFICATION	RESTRICTS	REQUIRES	AUTO-DOC
Kosher	Chemical treat.	COA, cert letter	✓
Halal	Alcohol contact	Halal cert	✓
Organic	Syn. pesticides	Organic cert	✓
FSSAI	Per product	Lab report	✓
APEDA	Per commodity	EIC reg.	—
FDA (US)	Per product	Prior notice	✓
Country label rules: EU · GCC · US · UK — auto-applied from shipping country on the order.			

Every order, every margin, every deadline — tracked in one place.

AI AUDIT SUMMARY — SO-089

Received Jan 3 via WhatsApp. Quoted Jan 5, accepted Jan 6. Packing delayed 2 days — FSSAI certificate arrived late on Jan 9. Resumed immediately. On track for Jan 14 container loading.

Every event is tamper-evident and timestamped. Full audit log available for FSSAI and DGFT compliance — no manual record-keeping needed.

Quote confirmed → Sales Order → Purchase list. One click each.

Same team. More orders. Better margins.

Handle more orders without adding headcount

Order intake, structuring, quote generation, PO creation — all automated. Your team's capacity doubles without a new hire.

Margin visibility across every order

Know which buyers, which SKUs, and which seasons actually make money. Stop growing volume on orders where margin is thin.

Faster quote turnaround = more orders won

When a buyer sends an RFQ today, you can turn a quote around today — not tomorrow after the re-entry is done. Speed wins deals.

Fewer errors = better buyer relationships

No wrong carton sizes, no missed cert requirements, no re-packing calls. Buyers who trust your execution come back and send more volume.

Export to new countries without compliance risk

New market, new buyer, new certification requirements — the rules engine handles it. Your team doesn't need to know every regulation for every country.

Owner out of daily operations

With automated task reminders, your team knows what to do and by when. You get status visibility without being the one who has to ask.

Built for how you actually work — WhatsApp orders, vendor prices, packaging constraints and all.

WHAT YOUR TEAM GETS FROM DAY ONE

No re-entry on orders

Stale price alerts before sending

Packaging PO auto-generated
